## NEW PRODUCTS EXPLANATION OF PHASES

- Phase 1 Product has been submitted and is pending initial review by the chairman of the committee.
- Phase 2 The product is under preliminary review by appropriate sections(s)/Division(s) and awaiting recommendations(s) to the chair from the appropriate section(s)/division(s). Minimal study of available literature is necessary at this stage.
- Phase 3 Product is under detailed laboratory and/or literature review by the New Product Review Committee.
- Phase 4 Product has been approved for experimental use by the New Product Review Committee. The product may be used on a limited basis; however, change orders must be submitted and approved prior to use of the product. The product will be monitored for performance for two years, but the performance period may be changed depending on the type of product and susceptibility to weathering. If the product performs poorly and poses a safety risk, the product may be removed
